

NORTHEAST NEBRASKA PUBLIC POWER DISTRICT
Nebraska 107 Wayne, Nebraska

Effective: January 1, 2019

Retail - Standby Service Rider - Lease Town

SEDC: 15 / 25, 16 / 26, 17 / 27

Availability

Available to members of the District that are customers in towns that have a current O&M lease agreement with Northeast. This rider can be applied to any existing rate schedule. The purpose of this modification to existing rates is to permit a 'non-permanent' disconnection of service. Examples of such voluntary disconnections of service would be winter vacations on a permanent residence or periods of vacancy on rental property. This rider will only apply on accounts where the service is disconnected. If the service remains active and regular bills are paid when due, then the regular rate schedule is to be applied.

Type of Service

Applicable on all rate schedules and services. If other rates specify minimum payments which require a greater monthly charge, then the higher of the amount specified by the rate or by this rider will apply.

Charges

Monthly Basic Facilities Charge/Customer Charge for the applicable rate plus 60% of the associated transformer minimum for each rate type. This charge is required each month even though the service is not energized. Trip charges for both the disconnection and reconnection of service will be applied when customer request service to be re-activated.

Town Residential	\$ 12.25 per month
Farm Single Ph.	\$13.70 per month
Rural 3 Phase	\$ 23.85 per month
Gen. Service Sing. Ph.	\$ 17.25 per month
Gen. Service 3 Phase	\$ 24.60 per month

Terms of Payment

Customers with services on this standby rider will continue to receive a monthly bill. In the event the current monthly bill is not paid by the due date stated on the bill, then delinquent charges shall be added according to District Collection Policy(s).

Adopted: January 22, 2019
